AIR INTELLIGENCE INFORMATION REPORT		
SUBJECT Fighting of Unidentified Object		
AREA REPORTED ON Honshu, Japan	FROM (Agency) Hq, FFAF, APO 925	EVALUATION B-3
DATE OF REPORT 20 June 1950	DATE OF INFORMATION 19 May 1950	
PREPARED BY (Officer) Maj. Edward R. McLean	SOURCE Two (2) F-80 Fighter Pilots	
REFERENCES (Control number, directive, previous report, etc., as applicable)		

SUMMARY: (Under concise summary of report. Give significance in final one-sentence paragraph. List enclosures at lower left. High text of report on AF Form 112, Part II.)

Report of the sighting of an unidentified object by two (2) F-80 pilots at 40°30'N 143°26'E (100 miles East of Misawa Air Base, Honshu, Japan) at 1040Z, on 19 May 1950.

An object was first detected by ground radar and the pilots were given a vector at 1030Z. At 1040Z the pilots made contact with an object. Several passes were made in an effort to determine its identity. The pilots reported the object as being similar to a box kite in appearance and having the approximate dimensions of thirty inches by twenty-four inches. (Incl #1-2-3-4) No visible means of supporting the object was noted and both pilots reported that it appeared to remain stationary. The object was under observation from 1040Z to 1052Z.

At 1000Z a dropsonde was released from an F-29 Reconnaissance aircraft in the approximate vicinity of the sighting. (Incl #5) The dropsonde is similar in appearance to the reported sighting, and it reached the surface at 1015Z.

COMMENT OF APPROVING OFFICER:

Since the object cannot be positively identified as the dropsonde, due to the incongruity of the time element, this report is forwarded for your information.

1. The object of the present study is to determine the effect of the use of the word "and" in the title of a paper on the number of citations it receives. The study was conducted by examining the titles of 100 papers published in the Journal of the American Statistical Association between 1950 and 1960. The results of the study are presented in Table 1.

CONFIDENTIAL

[REDACTED] 4th Fighter Bomber Squadron, Hawaii Air Base, APO 915, Honolulu, Hawaii. The following statement:

On the 19th of May 1954, my flight leader and I were on a regular mission. At about 1020 hours we received a call from the tactical control center to intercept a target they had picked up on their scope. We were vectored to the south. At that time we were sixty miles north of the base at thirty thousand feet. After receiving additional vectors, we were told that the target was on a heading of 80° and four miles ahead. This was the last position that the Control Center gave us.

The flight leader started a slow turn to the left and I followed in trail. The leader spotted the target and in a few seconds it was past the left wing. The altitude was between two and three thousand feet. After the initial pass we started to make more passes and to reduce our speed. We made six or seven passes on this object. On the last pass the flight leader dropped his flaps and landing gear and I dropped my flaps. We then past the object at 150 miles per hour indicated airspeed. The object did not appear to be moving at that time. The object was approximately two and a half feet across and approximately the same distance in height. It had the appearance of a kite. The object could have been square or triangular. It was made out of metal or at least appeared to be made of metal. During all of the passes I saw no visible means of support.

Below is my conception of the way the object appeared:

Claim Flying Discs Observed In West

MONTROSE, Colo., May 21.--
(UP) — Felix Zanon, 60, who
ranches on a mesa five miles east
of here, said he came out of the
back door of his home this morn-
ing and saw a huge silver disc
hovering over the city.

Zanon said the object was joined
almost immediately by another of
the same size, shape and color,
and both moved in an easterly
direction toward Cerro Summit, a

cut in the Rocky mountains 16
miles east of here.

Zanon said he did not believe in
"flying saucers" before 7:30 this
morning. After he saw the objects
--about 15 minutes later--he said:
"I'm a believer now."

He called his wife and said they

both watched the objects ~~spin to-~~
ward the mountains. His son, Bill,
came up from the field and both
Zanon and he watched the objects
through field glasses.

Bill Zanon said: "~~They're sau-~~
cers all right."
